

Strategic Planning

Even Keel Strategies focuses on defining **pragmatic**, achievable solutions for our clients. Strategies identified are tested for practicality against resource, funding, and environmental constraints our clients face. With every plan, a set of *Next Steps* are defined to help clients chart their path of implementation.

Our team brings extensive experience in strategic planning through work with state agencies, court systems, and municipal agencies to define strategic business and information technology plans.

Enterprise GIS

Geographic Information Systems are becoming critical tools for both business and government. Even Keel Strategies specializes in defining an overall GIS Strategy for an organization starting or enhancing their GIS approach. Services include:

- GIS Strategic Planning
- Enterprise Standards
- Geodatabase Design
- GPS / AVL Implementation
- GIS Interactive Websites
- GIS Services Architecture Design

Project Management

Your project deserves a project manager with the right experience, judgment, people skills, and technology skills. Good project managers shape a team to understand their contribution to the overall goal and build a sense of mission.

The project manager does more than track work, they anticipate risks, communicate in all directions, and roll up their sleeves with their team. This is our philosophy and approach.

Training and Mentoring services are also available.

Business Process Reengineering

Business Process Reengineering is the effort spent to understand a process or function, clarify its purpose, and analyze the current steps and issues. Recommendations identify efficiencies that can be made through a combination of changes to policies, steps, roles, and technology.

The results of this analysis often include a streamlined workflow, enhanced performance and more meaningful roles for your staff.

Project Reviews

Project reviews as a method of risk management. The best time for a review is when there is still time to take corrective action. Our 8-day fixed price project review service includes:

- Stakeholder Interviews
- Project Team Interviews
- Scope and Project Plan Assessment
- Technical Architecture Review
